PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in full stack web development, including front-end technologies (HTML5, CSS3, JavaScript) and back-end fundamentals (Java, SQL, Object-Oriented Programming, relational databases). Skilled in designing and building dynamic, scalable, and user-friendly web applications, with a strong foundation in data structures, software engineering principles, and database design. Known for clean, maintainable code, strong analytical thinking, and fast learning of new technologies.

TECHNICAL SKILLS

- Programming Languages: Java, SQL
- Web Technologies: HTML5, CSS3, JavaScript
- Core Computer Science: Object-Oriented Programming (OOP), Data Structures, Software Engineering, Database Management, Data Mining, Machine Learning
- Databases: SQL, Relational Database Design
- Tools & Platforms: Microsoft Office, Git (basic)

PROJECTS

Clinic Management System

Personal / Academic Project

- Designed and developed a web-based clinic management system to digitize patient registration, appointment scheduling, and doctor consultation records
- Built responsive front-end interfaces using HTML5, CSS3, and JavaScript for patient intake, appointment booking, and prescription viewing
- Designed and implemented a relational database schema in SQL to manage patient records, appointments, doctor schedules, and billing data
- Applied Object-Oriented Programming principles in Java to structure core modules, including patient, doctor, and appointment entities
- Implemented key workflows such as patient search, appointment conflict detection, and record retrieval, improving data accuracy and reducing manual paperwork

Geolocation Application

Team Project

- Led a team of 6 students to design and build a geolocation-based application from concept to completion
- Coordinated task planning and delivery across the team, applying core software engineering and project management practices

Online Calculator Application

Personal Project

- Built a functional calculator application in Java, applying core programming logic and OOP concepts

EDUCATION

B.E., Computer Science Engineering — Al-Ameen Engineering College

Sep 2021 – May 2025

Erode, Tamil Nadu, India | CGPA: 7.8

- Relevant Coursework: Java, SQL, Databases, Software Engineering, Data Structures, Data Mining, Object-Oriented Programming, Computer Fundamentals
- Extracurricular: Wrote monthly technical articles on Java and Python for the student tech blog; active member of the student programming group

Higher Secondary — Grace Matric School

2020 – 2021

Erode, Tamil Nadu, India | Percentage: 85.3%

ACTIVITIES & AFFILIATIONS

- Member, IEEE
- Member, Developers Club
